Section 1 - Identification of The Material and Supplier

Bioproperties Pty Ltd
36 Charter St
Ringwood, Vic 3134

Phone: 03 9876 0567 (office hours)
Fax: 03 9876 0556
Emergency 0417 548 879 (any time)

Chemical nature: The active ingredient consists of viable Pasteurella multocida (strain PMP-1) bacteria that have been freeze-dried in a protective buffer. Pasteurella multocida, strain PMP-1 is an attenuated vaccine strain. These organisms are unable to persist or continue replicating without access to specific nutrients typically provided by specially formulated culture media.

No adjuvants are included in the formulation of this vaccine.

Trade Name: Vaxsafe® PM Vaccine (living)
APVMA Code: 64191

Product Use: A vaccine to control Pasteurella multocida, Fowl Cholera, in poultry.

Creation Date: June, 2016
This version issued: November, 2016 and is valid for 5 years from this date.

Section 2 - Hazards Identification

Statement of Hazardous Nature
This product is classified as: Not classified as hazardous according to the criteria of SWA.

Not a Dangerous Good according to Australian Dangerous Goods (ADG) Code, IATA or IMDG/IMSBC criteria.

SUSMP Classification: None allocated.

ADG Classification: None allocated. Not a Dangerous Good according to Australian Dangerous Goods (ADG) Code, IATA or IMDG/IMSBC criteria.

UN Number: None allocated.

GHS Signal word: NONE. Not hazardous.

PREVENTION
P102: Keep out of reach of children.
P262: Do not get in eyes, on skin, or on clothing.
P281: Use personal protective equipment as required.

RESPONSE
P353: Rinse skin or shower with water.
P301+P330+P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
P370+P378: Not combustible. Use extinguishing media suited to burning materials.

STORAGE
P411: Store below -18°C.

DISPOSAL
P501: Dispose of small quantities and empty containers by wrapping with paper and putting in garbage. For larger quantities, if recycling or reclaiming is not possible, use a commercial waste disposal service.

Section 3 - Composition/Information on Ingredients

Ingredients | CAS No | Conc. (%) | TWA (mg/m³) | STEL (mg/m³)
--- | --- | --- | --- | ---
Biological culture substrates based on animal and vegetable proteins | not set | <1.0 | not set | not set
Other non-hazardous ingredients (containing the Pasteurella multocida organisms) | not set | 99.0 | not set | not set

The SWA TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equalled (but should not be exceeded) for no

SAFETY DATA SHEET

Issued by: Bioproperties Pty Ltd
Poisons Information Centre: 13 1126 from anywhere in Australia, (0800 764 766 in New Zealand)
General Information:
You should call The Poisons Information Centre if you feel that you may have been poisoned, burned or irritated by this product. The number is 13 11 26 from anywhere in Australia (0800 764 766 in New Zealand) and is available at all times. Have this SDS with you when you call.

Inhalation: First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.

Skin Contact: Gently brush away excess particles. Irritation is unlikely. However, if irritation does occur, flush with lukewarm, gently flowing water for 5 minutes or until chemical is removed.

Eye Contact: Quickly and gently brush particles from eyes. No effects expected. If irritation does occur, flush contaminated eye(s) with lukewarm, gently flowing water for 5 minutes or until the product is removed. Obtain medical advice if irritation becomes painful or lasts more than a few minutes. Take special care if exposed person is wearing contact lenses.

Ingestion: If product is swallowed or gets in mouth, do NOT induce vomiting; wash mouth with water and give some water to drink. If symptoms develop, or if in doubt contact a Poisons Information Centre or a doctor.

Injection: If accidental self-injection occurs, seek medical advice as soon as possible. Wash the wound under clean running water to remove any unabsorbed vaccine. Cover the wound with a band-aid, or suitable alternative, to stop any penetration of dirt. Inflammation of the area may occur. Seek medical or paramedical advice as to the extent and management of the tissue damaged, bring this SDS with you. Check your tetanus immunisation status. If this product has been mixed with an oil-based vaccine, consult their MSDS, seek medical attention immediately.

Advice to doctor: Pasteurella multocida is a bacterium that causes Fowl Cholera in poultry. It is a Gram-negative rod and, as such, contains cell wall constituents (e.g. lipopolysaccharides) that can elicit an inflammatory response when injected into tissues. This product consists of viable organisms of Pasteurella multocida, strain PMP-1, (an attenuated form of the bacteria that can cause Fowl Cholera) freeze-dried in a protective buffer. In cases of accidental self-injection or similar exposure, administration of antibiotics known to be effective against Pasteurella multocida may be considered. If this product has been mixed with an oil-based vaccine, consult their MSDS, complications may arise if treatment is delayed.

Section 4 - First Aid Measures

Fire and Explosion Hazards: The major hazard in fires is usually inhalation of heated and toxic or oxygen deficient (or both), fire gases. There is no risk of an explosion from this product under normal circumstances if it is involved in a fire.

Fire decomposition products from this product are likely to be irritating if inhaled.

Extinguishing Media: Not combustible. Use extinguishing media suited to burning materials.

Fire Fighting: If a significant quantity of this product is involved in a fire, call the fire brigade.

Flash Point: Does not burn.

Upper Flammability Limit: Does not burn.

Lower Flammability Limit: Does not burn.

Autoignition Temperature: Not applicable - does not burn.

Flammability Class: Does not burn.

Section 6 - Accidental Release Measures

Accidental release: Treat the affected area with disinfectant or hot water (to inactivate the vaccine) while preventing run off from entering drains. In the unlikely event of a significant quantity of material entering drains, advise emergency services.

Section 7 - Handling and Storage

Handling: Keep exposure to this product to a minimum, and minimise the quantities kept in work areas. Check Section 8 of this SDS for details of personal protective measures, and make sure that those measures are followed. The measures detailed below under “Storage” should be followed during handling in order to minimise risks to persons using the product in the workplace. Also, avoid contact or contamination of product with incompatible materials listed in Section 10.

Storage: Store packages of this product below -18°C (deep freeze).
Section 8 - Exposure Controls and Personal Protection

The following Australian Standards will provide general advice regarding safety clothing and equipment:

**SWA Exposure Limits**

<table>
<thead>
<tr>
<th>TWA (mg/m³)</th>
<th>STEL (mg/m³)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Exposure limits have not been established by SWA for any of the significant ingredients in this product.

No special equipment is usually needed when occasionally handling small quantities. The following instructions are for bulk handling or where regular exposure in an occupational setting occurs without proper containment systems.

**Ventilation:** This product should only be used in a well ventilated area. If natural ventilation is inadequate, use of a fan is suggested.

**Eye Protection:** Eye protection is not normally necessary when this product is being used. However, if in doubt, wear suitable protective glasses or goggles.

**Skin Protection:** This product may be shipped in dry ice. When unpacking, wear gloves designed for use in freezers. The information at hand indicates that this product is not harmful and that normally no special skin protection is necessary. However, we suggest that you routinely avoid contact with all chemical products and that you wear suitable gloves (preferably elbow-length) when skin contact is likely.

**Protective Material Types:** There is no specific recommendation for any particular protective material type.

**Respirator:** Provided the operator is working in a well-ventilated area, a respirator is not necessary. Do not work with liquid nitrogen in small, poorly-ventilated areas without air drainage at floor level.

Safety deluge showers should, if practical, be provided near to where this product is being handled commercially. Always wash your hands after using the product.

Section 9 - Physical and Chemical Properties:

**Physical Description & Colour:** A pale cream-coloured cake of freeze-dried vaccine in a 3 mL glass vial. The vial closure consists of a rubber stopper and silver tear-off seal. Each vial has a label which is white with a mauve strip and black print. Each vial contains 500, 1000 or 2000 doses.

- **Odour:** No data.
- **Boiling Point:** Not applicable.
- **Freezing/Melting Point:** Decomposes before melting.
- **Volatiles:** No data.
- **Vapour Pressure:** No data.
- **Vapour Density:** Not applicable.
- **Specific Gravity:** No data.
- **Water Solubility:** Miscible.
- **pH:** No data.
- **Volatility:** No data.
- **Odour Threshold:** No data.
- **Evaporation Rate:** No data.
- **Coeff Oil/Water Distribution:** No data.
- **Viscosity:** Not applicable.
- **Autoignition Temperature:** Not applicable - does not burn.

Section 10 - Stability and Reactivity

**Reactivity:** This product is unlikely to react or decompose under normal storage conditions. However, if you have any doubts, contact the supplier for advice on shelf life properties.

**Conditions to Avoid:** This product should be kept in a cool place, preferably below 30°C. Containers should be kept dry. Store in the closed original container in a dry, cool, well-ventilated area out of direct sunlight.

**Incompatibilities:** Acids, bases, oxidising agents.

**Fire Decomposition:** No specific data. Based on composition of proteins and fats, the following might be expected: Carbon dioxide, and if combustion is incomplete, carbon monoxide and possibly smoke. Nitrogen and its compounds, and under some circumstances, oxides of nitrogen. Oxides of sulfur (sulfur dioxide is a respiratory hazard) and other sulfur compounds; also water.

**Polymerisation:** This product will not undergo polymerisation reactions.

Section 11 - Toxicological Information

**Local Effects:**
**TargetOrgans:** There is no data to hand indicating any particular target organs.

### Classification of Hazardous Ingredients

<table>
<thead>
<tr>
<th>Ingredient</th>
<th>Risk Phrases</th>
</tr>
</thead>
<tbody>
<tr>
<td>No ingredient mentioned in the HSIS Database is present in this product at hazardous concentrations.</td>
<td></td>
</tr>
</tbody>
</table>

**Potential Health Effects**

#### Inhalation:

**Short Term Exposure:** Available data indicates that this product is not harmful. In addition product is unlikely to cause any discomfort or irritation.

**Long Term Exposure:** No data for health effects associated with long term inhalation.

#### Skin Contact:

**Short Term Exposure:** Available data indicates that this product is not harmful. It should present no hazards in normal use. In addition product is unlikely to cause any discomfort in normal use.

**Long Term Exposure:** No data for health effects associated with long term skin exposure.

#### Eye Contact:

**Short Term Exposure:** This product may be mildly irritating to eyes, but is unlikely to cause anything more than mild discomfort which should disappear once product is removed.

**Long Term Exposure:** No data for health effects associated with long term eye exposure.

#### Ingestion:

**Short Term Exposure:** Significant oral exposure is considered to be unlikely. However, this product may be mildly irritating to mucous membranes but is unlikely to cause anything more than mild transient discomfort.

**Long Term Exposure:** No data for health effects associated with long term ingestion.

#### Injection:

**Short Term Exposure:** Needlestick injuries can occur when manual vaccination techniques are used. Resultant injuries are due to the effects of the penetration of the needle, its cleanliness at the time of penetration and the volume injected. The inoculum itself is not regarded as toxic, it is injected into day-old chicks or embryos as part of normal vaccination procedures.

### Carcinogen Status:

- **SWA:** No significant ingredient is classified as carcinogenic by SWA.
- **NTP:** No significant ingredient is classified as carcinogenic by NTP.
- **IARC:** No significant ingredient is classified as carcinogenic by IARC.

### Section 12 - Ecological Information

Insufficient data to be sure of status. Expected to not be an environmental hazard.

### Section 13 - Disposal Considerations

**Disposal:** Discard unused vaccine and empty vaccine bottles into a disinfectant solution (e.g. chlorine based bleach). Dispose of any such inactivated, unused vaccine and empty containers by wrapping in paper and putting in garbage. In cases of spillage, soak up the liquid with an absorbent sponge or cloth and incinerate. Treat the surface with a disinfectant solution (e.g. chlorine based bleach).

### Section 14 - Transport Information

**UN Number:** This product is not classified as a Dangerous Good by ADG, IATA or IMDG/IMSBC criteria. No special transport conditions are necessary unless required by other regulations.

### Section 15 - Regulatory Information

**AICS:** All of the significant ingredients in this formulation are compliant with NICNAS regulations.

### Section 16 - Other Information

This SDS contains only safety-related information. For other data see product literature.

**Acronyms:**

- **ADG Code**
  - Australian Code for the Transport of Dangerous Goods by Road and Rail (7th edition)
- **AICS**
  - Australian Inventory of Chemical Substances
- **SWA**
  - Safe Work Australia, formerly ASCC and NOHSC
